Special Highlight

Prof. Esther Chan Supports Next-Gen Scientists at Mentorship Launch!

The 7th "Master-Apprentice Mentorship" Programme held its launch ceremony on 15 March, attended by nearly 300 guests, students, school principals, and parents.

The event highlighted that **nurturing the next generation of scientists** is a shared mission for researchers, educators, and the government. With Hong Kong now in a **"golden era" of innovation and technology**, collaborative efforts among the government, academia, and professional organisations can further **expand and enhance STEM education**, making it more inclusive and impactful

About CSMPR

Centre for Safe Medication Practice and Research (CSMPR) was established in 2012 to foster research and development in medication safety in collaboration with local and international partners.

The mission of the CSMPR is to improve the health and quality of life of patients through interdisciplinary collaborative research that addresses questions central to medication safety. We focus on delivering innovative results that optimise the safe and effective use of medications. Combining expertise from the University of Hong Kong (HKU) and collaborative partners around the globe, the CSMPR provides a world-renowned platform for the training of health care professionals, patients and the general public on the safe and effective use of medications.

Our aim is to deliver high quality research with results relevant and applicable to health in real world settings, thus optimising and promoting the safe and effective use of medicine in Asia and beyond.
